Full outdoor display
 Weather protected

Capability of storing several pages of data
 Can show analog clock

Capability of display in any language

L.E.D Display

Board Specification

1. Length – 6 feet - Length – 6 feet
2. Breadth – 4 feet - Breadth – 4 feet

3. **Character size: 2" (50mm)** - Character size: 2" (50mm)
4. **Minimum number of lines to be displayed - 3 lines of information** - Minimum number of lines to be displayed - 3 lines of information
5. **Maximum number of lines to be displayed - 10 lines of information.** - Maximum number of lines to be displayed - 10 lines of information.
6. **Number of characters per line – Flexible to display 16 / 24 / 32 / 40 / 48 characters** - Number of characters per line – Should be flexible to display 16 / 24 / 32 / 40 / 48 characters
7. **Real-time clock: date and time** - Real-time clock: date and time
8. **Language** – Multi Language Capability
9. **Red Color Display** - Red Color Display
10. **Store & displays up to 200 messages** - Store & displays up to 200 messages -
11. **Facility to design and display desired information in single screen (page) shall be available.** - Facility to design and display desired information in single screen (page) shall be available.
12. **Store and display up to 100 pages** - Store and display up to 100 pages
13. **Automatic page scroll feature should be available. The pages shall automatically refresh at a rate of >30 seconds.** - Automatic page scroll feature should be available. The pages shall automatically refresh at a rate of >30 seconds.
14. **Provision to change / update data from PC** - Provision to change / update data from PC
15. **Software for data transfer and updating data from computers connected to LAN.** - Software for data transfer and updating data from computers connected to LAN.
16. **The software should enable daily data updation.** - The software should enable daily data updation.
17. **Weather protection covers (box type).** - Weather protection covers (box type).
18. **Cable for connecting display board and computer (50 meters)** - Cable for connecting display board and computer (50 meters)
19. Stand for mounting board on wheels

[Feature and Specification of the Controller used in our board]

| | |
|---|--|
| Control size (mono/RG color) | 32,768 pixels Self adjustment the size,such as 512*64, 1024*32 |
| Memory | Total size: 256MByte (2Gbit) Program size: 128MByte Font library space: 128MByte |
| Program | <p>All programs are transmitted by compression package, and then decompressed on control card.</p> <p>Supports animation(swf,gif) , picture, text, clock, temperature, etc.</p> <p>Text program edit in any language, any font and any size, free adjust</p> <p>Transparent text and clock program can be edit to cover photo</p> <p>More than 60 effects for text and picture, such as: snow fall, mosaic, slide zebra, fan open and etc.,</p> <p>With multi-program mode. Stores up to 512 programs to the Led screen.</p> <p>With hierarchical management of programs in menu type so as to keep clear structure and convenient maintenance.</p> <p>Supports programs played at the appointed period (for example: week, hour, minute)</p> |
| Separate window mode | Supports the segmentation of up to ten playing windows for each program. Supports playing the content in different formats for each playing window. |
| Affiliated features | <p>With real-time clock (RTC) management and setting, support digital and simulative clock.</p> <p>Supports environmental data programs like temperature, etc.</p> <p>Supports sensors installed externally (32-grade brightness)</p> |
| Standard software | CenterV3.54 or above |
| Standard communication mode | <p>RS232/RS485 : maximum baud rate: 115200</p> <p>network version: TCP/IP network interface, encrypted message transmission</p> <p>USB flash disk version: USB interface</p> |
| InDa remote & keyboard | Program list edit and display control by infrared controller or keyboard |
