

L.E.D Production Displays

We are listing the various options available in the LED displays. The visuals are only indicative. We make LED display boards with LED's of various sizes, brightness and colours. We make boards as per your specification and layout. Our boards can accept inputs from various sources including Your **PC, RS232, RS485, PLC, Relay contacts, DC Input, Hand Held Remote Controls (IR), Keypad, SMS** etc.

*Just mail your requirement right away - We will revert with complete specs, visuals and estimate within hours by email
We can follow this up with a site visit and a demonstration of the product (wherever possible)*

TAKT Displays

Real time Target Vs Real time Production Display.
Keypad / IR Remote / PC input for setting TAKT.
Input from line increments Actual production. Embedded software calculates Real time target / variance / gap

TAKT Displays - Production Display with Break Timings

Real time Target Vs Real time Production Display.
Break Timings can be incorporated in the Display. Real Time Target Suspends during Break Timings. Keypad / IR Remote / PC input for setting TAKT.
Input from line increments Actual production. Embedded software calculates Real time target / variance / gap

L.E.D Production Displays

Safe Man-Hours data Display

For display of safe man-hours and longest accident free period

Shift Production with Gap and Efficiency Display

Input for Target done manually, Actual Data is input from line, Gap and Efficiency calculated automatically by Display.

PPM Displays

Input for all parameters done Via Keypad / IR / PC

L.E.D Production Displays

Daily & Shift Production Display

Input for Day / Shift Targets are received from line.
Actual is input from line.

Kaizen - OEE display

Inputs for Approvals and Rejects are received from line. Reject Ratio is calculated automatically by board.

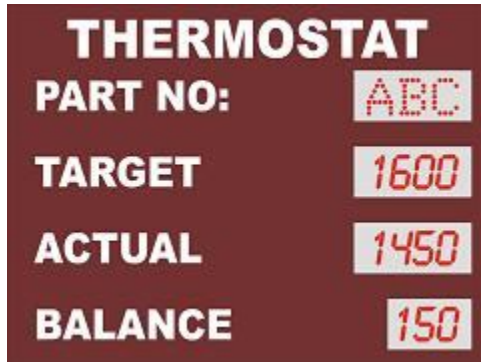

Product Mix Chart Display

Input the Premix required to get the production mix chart
Input premix code Via Keypad / IR Remote / PC.

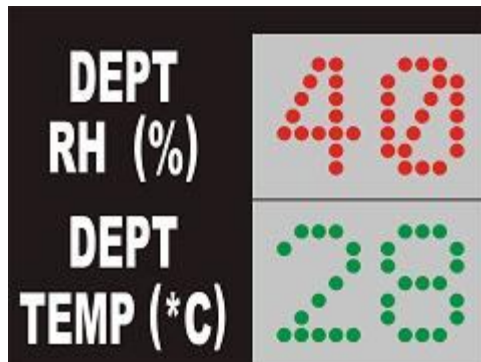

L.E.D Production Displays

Online Production display with Alpha numeric indicator for part number

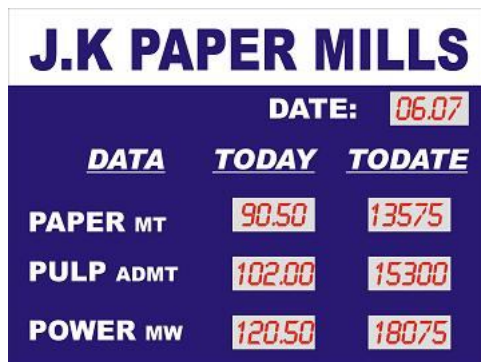

* PC / Keypad entry for Part number and Target. Actual is input from line. Balance is calculated automatically by board.

Online Humidity / Temperature indicators

Display converts your analog data to digital display on board

Offline Statistical Display

For display of current production data vis-à-vis historical data

L.E.D Production Displays

Productivity Score Board

TEAM NAME	QTY %	ATT %	ACW %	ATTN %	BALCON %	CRP %	AUD. CLERK %
